

# GET YOUR BOOM! BACK

## Our Story and Products

### Welcome To The Team

Thanks for joining the Get Your Boom Back Affiliate program. My name is Anwar Craven and I am one of the founders of the business and I would just like to give you an overview of the business, our journey to start the company and our products.

The GYBB product range and free to join affiliate opportunity is unique and unrivalled in the industry. Our product range has unique products that you will not be able to find anywhere else in the world and they are all priced sensibly so that anyone can afford to use them and experience the benefits. Combine this with a high commission and free to join affiliate program that anyone can join for free and start earning sales commissions straight away and you have a rare opportunity to build a business that can deliver you a great income stream.

### About Us

When you are making the decision to invest the most valuable thing you have in life (your time) we feel it is important that you have confidence in all areas of the company / products and people behind the company. So first lets cover a little bit about the Get Your Boom Back business and the story and people behind the company.

### Meet The Founders

#### Angela K Wright MBE

Angela has had a stellar career owning Theme Parks in the UK and has now emigrated to Australia where she mentors businesses as well as running her own businesses.

Angela has generated millions of dollars in both hemispheres; has been invited to speak around the world and been honoured by HM Queen Elizabeth II at Buckingham Palace with the award of a Member of the Order of the British Empire.

Angela is an author and business speaker who is passionate about giving back and helping businesses flourish that support the local community. She is an expert in reputation and social media marketing.

Angela brings a wealth of experience to the GYBB business and will ensure we continue to grow and help as many people as possible by being built on solid foundations.

## Anwar Craven

---

I started in business aged 18 and for the last 20 years have built businesses in the telecoms and marketing sectors. Most notably with fellow GYBB founder Jamie we developed an internet marketing system together which propelled our Ad-pods business to global page 1 position in just 3 weeks!

Having ran marketing campaigns with Ad-pods for many of the worlds biggest brands such as Virgin, British Gas, Coca Cola, BMW as well working in the public sector with multiple Police forces and the NHS.

I bring a wealth of marketing experience to the business especially in focused on Online / Offline / Video and Internet marketing.

I am also our most active team member with the frequency formulation for our products and is the author of the soon to be released health book titled "How To Get Your Boom Back".

## Jamie Flaherty

---

Jamie has been in business for over 15 years since his degree as a design, construction and internet marketing expert. Together with his fellow GYBB partner Anwar has built over 1000 websites as well as developing multiple unique systems to increase website ranking in the search engines.

Jamie and Anwar are founders of some notable sites such as

[www.ad-pods.com](http://www.ad-pods.com) (Mobile Marketing)

[www.advertisingglass.com](http://www.advertisingglass.com) (Display Marketing)

[www.ireally.co.uk](http://www.ireally.co.uk) (Internet Marketing)

[www.promotionalvideos.co.uk](http://www.promotionalvideos.co.uk) (Video Production and Marketing)

Jamie is a design guru and brings a wealth of skill to GYBB covering all aspects of design, web, marketing materials and site function.

Jamie expertise will make sure all the products and marketing materials we ever release are cutting edge and keep us ahead of the competition.

---

Collectively the founders bring a wealth of experience and a track record of success. We have the technical and marketing experience and also access to all the resources we need to continue growing this business.

## Our Story

Like all good businesses there is a story behind the idea and the journey. The Get Your Boom Back journey is a story of triumph over adversity. It started back in the 1980's my brother was stabbed as a 16 year old. The stabbing effectively ended his career as a professional footballer only a few weeks after he signed his football contract. This was a cruel twist of fate that he never recovered from and lead to chronic alcoholism over a 30 year period. Leading to many spells in intensive care, 4 suicide attempts and host of painful periods and experience as I am sure anyone who has had first hand experience with alcoholism can relate to.

I felt very let down by the system as spells in rehab and going through all the official treatment protocols and channels failed to help my brother. Undeterred and always looking for solutions in 2013 I heard about a new frequency treatment that we had not tried that was getting very good results I booked on to meet with the inventor (our secret genius) and I got trained and bought the equipment to treat my brother. Within days of frequency treating my brother I saw an incredible change in his mental wellbeing and we were able to eliminate the triggers that caused such vicious and debilitating drinking. To this day he is happy healthy and a quantum leap from where he had been in the previous 30 years.

Left with the ability to help others I began sending frequency to friends and family and word spread and more people came and the results were very good for all sorts of conditions such as arthritic pain, anxiety, stress, depression, low energy to name a few. So I sat down with my business partners Angela Wright MBE and Jamie Flaherty and together we formed the founding principals for a business who's sole purpose was to help others using unique products designed to increase energy and wellbeing.

So over many months and a lot of flights around the world we have been able to create a simple powerful and most importantly affordable product range that can help a lot of people to as the name suggests "Get Their Boom Back".

Angela wrote a blog post talking about her reasons for starting this business that you can read on this link: <http://www.getyourboomback.com/blogs/news/>

---

## Our Founding Principals

GYBB is founded on some simple principals all around helping as many people as possible. We are in the fortunate position of being well funded so we can make decisions for the right reasons and not like many companies that are "all about the money". For us we view the importance of making a profit only in the terms of giving us the platform to do more good in the community and develop even more products that can allow us to help even more people.

### Our founding principals are:

- Produce high quality products (that really work)
- Make them affordable to all because often the sickest people are also the poorest
- Give inventors and creators a platform to offer their products through our channels
- Always offer exceptional service
- Always be innovating
- Always have the customers wellbeing central to any idea / product / project
- Operate the most open and ethical business in the industry
- Provide our partners and affiliates with the ability to earn income equal to their individual efforts (unlike many others in the industry)
- Use profits to run campaigns that help the sickest people to use our products for free or at reduced prices

## Our Product Range

We have a product range that works synergistically together using cutting edge technology designed to help people to increase their energy and wellbeing. We have made this product range because we believe that at no point in history has the population (on mass) been under such an intense and diverse assault of physical and mental stresses.

### Modern Life

Just take a look around and you can see that in just the last 20 years obesity, diabetes, depression, cancer, heart disease have all hit record levels.

Modern life means we are working harder and longer hours, we rarely take time to be calm, quiet and still because our time is so limited, our to do list is huge and if its not the iPad, its Facebook or Twitter or a text message drawing our attention. We are constantly on the go which is mentally and physically placing a huge stress on our bodies.

Combine this with a failing economy where current figures estimate that as much as 50% of families are living on or below the poverty line and even relying on food banks to eat! Many people are living in a constant state of anxiety which as we all know leads to disease and physical issues.

Then to make matters worse we have the lowest nutrient rich diets at any point in history through a combination of processed foods and modern farming methods that do not allow enough time for the soil to replenish and thus lowers the nutrient content of our foods.

If that was not enough we are all combating constant toxins and pollutants from the chemicals in our water supply to the daily products we use such as toothpastes, deodorants, haircare, skincare and cleaning products that are all full of a concoction of chemicals that on a daily basis build up in tiny amounts to create a chemical soup in our bodies that further stress the body.

***So lets now take a look at our products.....***

## Amino Boosters - Containing Pure Norwegian YTE®

GET YOUR BOOM! BACK

Contains 100% Pure YTE™

AMINO BOOSTERS

Contains 22 Amino Acids

**DID YOU KNOW THAT..**

**AMINO ACIDS**

- Increase Energy
- Reduce Stress
- Improve Sleep
- Fast Muscle Recovery
- Promote Healthy Skin

AMINO BOOSTERS

GMP

NORWEGIAN QUALITY AND PURITY

The human body is estimated to be made up of more than 70% water and approximately 20% Protein. Protein is the major building block of all muscle and tissue in the body. The basic building blocks of Protein are called Amino Acids so it is vitally important that we as human beings consume the right balance of bioavailable Amino Acids.

The problem is that our diets do not give us a consistent and balanced mix of all the Amino Acids and many people are deficient in them which leads a host of different conditions and issues.

Without getting into any contentious political debates as there are so many varying opinions on the subject of what type of nutrients and diet we really should be having. I ask you to just ask yourself this one question

***“If we can land a man on the moon, chart DNA and conduct a call over the internet from a mobile phone in real time to anywhere in the world then why has no scientific body / company / university or government mapped out the perfect dietary needs to eliminate most illnesses and keep us all at an optimum level of health?” - it doesn't make sense?***

It seems like every year there is the next “must do” diet from the next up and coming fitness guru usually selling a book on the subject. There have been many horrendous diet plans that have hit mainstream media and been backed to the highest level but years later it is revealed they did not work and in actual fact were placing a terrible strain on the body.

If you want to share your thoughts with us on this topic please join the conversation with us on:

**Facebook** - <https://www.facebook.com/getyourboomback>

**Twitter** - <https://twitter.com/getyourboomback>

---

So we brought Amino Boosters into our product range for one simple reason ‘the human needs Amino Acids’. They are as important as good sleep, water and a balanced healthy diet made with fresh fruit and vegetables.

However not all amino acid sources are the same..... there are thousands of synthetic and factory made nutritional supplements on the market and most are just expensive urine!

Amino Boosters are made from pure Norwegian YTE® which stands for Young Tissue Extract. YTE® is one of the most studied and documented nutritional supplements in Norway as it was developed by the Norwegian government in the 1970's. It has documented effects in multiple published medical papers that have shown it to:

- Reduce the bodies stress response by lowering the bodies master stress hormone cortisol
- Lower depression and increase a persons sense of wellbeing
- Increase sex drive
- Increase muscle strength and recovery
- Increase brain function (memory / concentration / focus)
- Improve sleep quality

The reason it has such a wide ranging effect on people is because Amino Acids play so many important roles in the body and YTE® uses a patented extraction process that takes all the nutrients from fertilised (and most importantly 9 day incubated) hen eggs.

It was discovered by monitoring the 21 day growth cycle from an egg to a hatched chick that on the 9th day of incubation the egg white (albumen) contained lots of vital nutrients and powerful elements that caused the growth cycle of the embryo into a chick to triple.

These powerful fibroblast growth factors and peptides are harvested along with the complete range of 22 amino acids using the patented process our manufacturer in Norway uses to make a very

powerful bioavailable supplement that is shown in the medical studies to have a host of benefits to the user.

We highly recommend that you spend a little time watching the videos we have made with the creator and patent holder to get a full understanding of just how powerful YTE® is and also read the medical studies and the informative page we have created that explains the roles Amino Acids play in the body.

You can view the videos on the about YTE® page on the link below

<http://www.getyourboomback.com/pages/about-yte>

You can read the medical studies on YTE® on the link below

<http://www.getyourboomback.com/pages/yte-clinical-and-medical-studies>

You can read about the important roles Amino Acids play in the body on the link below

<http://www.getyourboomback.com/pages/about-amino-acids>

---

### **Customer Feedback - Amino Boosters**

On the amino boosters page you can read the reviews we have had on the product at the bottom of the page.

<http://www.getyourboomback.com/products/amino-boosters>

In the last 6 months the most common feedback we have received from our customers is that their:

- **Sleep quality is improved**  
Within a 3-5 days sleep quality becomes more rested
- **Increased Energy**  
The better sleep seems then give the customers more energy
- **Sense of feeling calmer and less stressed**  
Again most likely linked to better sleep and also lower cortisol levels customers are reporting that they feel calmer.
- **Improved Muscle Strength / Recovery**  
Customers also report a noticeable increase in muscle recovery after exercise reporting less soreness in the days after exercise.
- **Improved Skin Tone**  
Many customers notice that their skin tone improves.

However as an affiliate this is most definitely a product you need to try for yourselves. Remember nothing sells better than someone simply sharing their own true personal experience with a product.

We always use a simple example to explain this and that is if you watch any of those horrible infomercials and shopping channels you (more often than not) do not believe what you are being told because it's clearly an actor or paid presenter. However when a friend shares with you a positive experience you immediately buy into it because you trust the person telling you.

### **Important Points To Note**

Unlike many other companies who force distributors to purchase product each month in order to get paid. We are very different because we do not require you to purchase a starter kit or ever be tied into using our products each month in order to get paid. We know our products are incredible and we do not want to make using them mandatory because we are confident you will love them when you try them and if you love them then you will naturally want to continue to use them.

That said we highly recommend as an affiliate you experience our products because your personal story / belief and experience is what will help you to effectively share these wonderful products with others.

Because we ship products globally we as a company must be very careful with what we write in describing the benefits of our products so as to be compliant with all the different countries laws on food supplements. So it is going to be very important that we as a company film hundreds of real testimonials from our customers because the social proof of hundreds of people sharing their experience using our products will make it so much easier for us to share these products with as many people as possible.

So we ask our affiliates to help us in these early stages with this if you or your customers have a positive experience please share that with us either in writing or on FaceTime / Skype video call..... your feedback really does matter!

---

## Frequency Wristbands - Quantum Resonance Technology

GET YOUR  
**BOOM!**  
BACK

 **FREQUENCY WRISTBAND**

**FREQUENCY & ION  
BASED TECHNOLOGY  
4000+ NEGATIVE IONS**

**TOURMALINE, TITANIUM &  
GERMANIUM INFUSED SILICONE  
[CLICK HERE TO READ MORE](#)**

### How do they receive frequency?

Our wristbands receive bioresonance frequencies using a quantum physics phenomenon which is called 'non locality of photons'. In layman's terms quantum physicists conducted experiments where they took two photons (tiny components of light) that were joined and separated them and placed them over great distances apart (Moscow to Los Angeles) and they found to their amazement that if they changed the direction the photon spun (clockwise to anticlockwise) that at exactly the same time the photon on the other side of the world changed direction in tandem with the other!!

Einstein famously quoted that this was "spooky" because it proved that everything truly is

connected because in the microscopic quantum world communication happens instantaneously over potentially infinite distances.

This same phenomena is attributed to how mothers often report feeling a deep sense of loss when a child is injured or killed and they “just new” something bad had happened before they received the call to tell them what had happened.

It happens in nature how birds communicate intuitively with no sound while flying in perfect unison. Twins report how they know how their twin brother or sister is feeling even when at great distances.

These quantum phenomena may not make the nightly news but if you google search terms like “quantum entanglement” and “non locality of photons” you will see this is a very well studied area of science. In fact a recent article in the media discussed how the Chinese government are working on quantum computing to be able to create an “unhackable” internet.

---

## How Can Frequency Help A Person?

We send bioresonance frequencies to the wristband. These frequencies are like information packets that the bodies bio-field absorbs and it triggers a response from the body.

If you google search bioresonance practitioners you will find there are thousands of trained bioresonance practitioners who use bioresonance frequencies to treat patients for a wide variety of conditions such as:

- Irritable Bowl Syndrome
- Chron’s Disease
- ME / Chronic Fatigue Syndrome
- Depression
- Anxiety
- Allergies
- Muscular Pain
- Headaches and many more conditions

Bioresonance therapy is also extremely good at treating addictions and phobias such as:

- Alcoholism
- Drug Addiction
- Gambling Addiction
- Smoking Addiction
- Fear of Spiders
- Fear of heights and many more

In Asia and the Eastern Block of Europe bioresonance is used widely by therapists and Doctors but in the western world it is barely known. There are several really powerful frequency technologies and therapies out there such as PEMF - Pulsed Electromagnetic Fields which have an awful lot of documented studies that show on a multitude of conditions the body can be triggered to heal itself by simply using frequency.

## Did you know that the Earth has a pulse?

The Earth has a resonance frequency called the Schumann Resonance of 7.83hz.

Amazingly it is the same frequency that the human heart resonates at!!

A very interesting documentary about how frequency can positively and negatively effect human health called “Resonance - Beings of Frequency” covers this point in more detail on this link

<https://vimeo.com/54189727>

Interestingly when we started sending astronauts into space it was discovered that because the astronauts were not receiving the Schumann resonance (the earth's frequency) they began to get sick. So this led to the Russians and Americans to develop frequency devices to keep the astronauts healthy, as there are no hospitals in space and it would not be good to accidentally park a space shuttle in a city centre! This led particularly in Russia and the Eastern Block of Europe to many different frequency and resonance technologies to be developed and used medically for healing, pain control, muscle and tissue repair and much more.

So this is a very wide ranging area and this is not new technology in the sense that it has been scientifically documented for many years that frequency can have both a good and bad impact on the human body.

Unfortunately for the population as a whole these technologies have never been adopted by the mainstream despite thousands of independent Doctors and Practitioners having treated hundreds of thousands of people.

### ***”Why is this you may be thinking?”***

Honestly I can only hazard a guess and my personal opinion on this is that a frequency machine costs between £10,000 - £15,000 and it can treat thousands of people with no ongoing cost or money to be made. Where a poorly person who is on medication for life is worth 10 times that figure. Maybe I am wrong but it seems absurd to me that there are devices out there that resonate a frequency and have many very positive impacts on many conditions and they are not used.

As we covered in the beginning of this document we only formed this business after helping friends and family with frequency treatments and we were blown away by the results and the speed at which we achieved those results.

The many forms of frequency treatments and technology available in the world today have in my opinion been heavily suppressed and there are all sorts of smear campaigns online labelling them “pseudoscientific quackery”. Which is a crying shame because the advances that could be made in treating all manner of diseases and conditions both physical and emotional I believe (based on what I have seen) would be staggering if this was given the funding and backing that is thrown into creating the next patentable pill.

It is all a matter of opinions and I encourage you all to do your research or simply try a frequency wristband and feel some frequency for yourselves. We are so sure the product works we offer a 100% money back guarantee to you.

One final little known science fact on frequency is that frequency creates form! It is theorised that sound / vibration actually created everything that has mass!

Watch this video and see how different frequencies create different shapes....

<https://www.youtube.com/watch?v=vwJAgrUBF4w>

All very interesting stuff and we will certainly be sending you more information on frequency and quantum science and we will frequently post educational posts on our facebook page / group and twitter.

---

## **Why Do We Use Wristbands?**

After seeing such impressive results with doing frequency machine treatments on people we looked at how we could scale bigger to be able to help more people and we encountered a few problems which were:

1. We needed to scan a persons biofield to be able to send frequency to them remotely
2. The machine can only send to one person at a time
3. The machines are expensive and we would need a lot of them.
4. Running the machine required a lot of staff
5. The end user treatment cost became very expensive especially for people with conditions that required a lot of frequency to be sent on a regular basis

This caused us to develop the Frequency Wristband because it solved all of the problems above. Our technology means we link the wristband to our Frequency Server (removing the need to scan in the person). We do not need lots of machines because our server technology means we send in a much more efficient way. The software means the wristbands receive frequency on set protocols and do not require hundreds of people to be manually selecting frequency.

The outcome of all those savings through better technology is that we can send amazing amounts of daily frequency to an unlimited number of people and be able to deliver this for less than the cost of 1 hours Frequency Machine treatment for an entire year to the wristband.

This means that we can enable anyone to be able to experience the benefits of frequency at a price that anyone can afford.

---

## What Does Frequency Do?

As I have explained already there are thousands of practitioners who use frequency for treating a whole manner of conditions. On my personal journey into frequency this year I have seen things happen that astonished me. In my wonderment along the way the one thing I did badly (particularly with my background of owning an internet and video marketing company) I did not take enough video testimonials that we can use at launch. This is something I will be actively seeking to rectify in the first quarter of 2015.

Below are a few of the recently filmed testimonials and small explanation for each.

### **Johnny Cope - Machine Treatment After A Stroke**

Johnny was a corporate high flyer before being struck down with a stroke. It's a good interview because he is very open and confident on camera (which many people I treat are not). The improvement he felt in the side of his body that had a stroke SHOULD NOT HAPPEN..... we are talking brain damage from a stroke and within 2-3 hours he had clearly more mobility in his effected side from frequency.

<https://www.youtube.com/watch?v=7uuortlMMNO>

### **Nigel - Amazing Video - Machine Treatment After A Stroke**

While Angela was in the UK as we set this up I was at her house and a friend of mine asked me to treat Nigel. He turned up at Angela's house and by chance happened to be her eldest sons former teacher. During the treatment Angela was working away as I was explaining something to Nigel and he started smiling so I asked him "what are you feeling?" he said your not going to believe this but I've got pulse going down my left arm and I have not felt anything in that arm for a year since before the stroke!!

Immediately Angie perks up gets her camera out and says "really? your serious?" this is the resulting video and if you listen at the end Angie makes a slight disbelief noise haha because honestly this should not happen it defies all known logic that we are told is possible..... but that does not make it any the less real

<https://www.youtube.com/watch?v=kCOMny71QQE>

### **Trevor And Marilyn - Machine Treatment After A Major Knee Operation**

Trevor is one of my good business associates in Australia we finally met when I was in Sydney to meet with Angie in August. Now Trevor was there to see me about Ad-pods business because he is very well connected in Australia with the biggest advertising agencies. He brought Marilyn with him and she was in constant pain with a knee problem that she has suffered with for years and she was due to undergo quite extensive surgery. So this lead me to tell him all about this crazy frequency stuff I was working on. Trevor then tells me he only sleeps a few hours a night as a result of a past life as a hells angel and that his adrenal glands are shot to bits.

So they shipped over some hair samples and I began sending them both the formula that is being used in the wristbands. See what they have to say.....

<https://www.youtube.com/watch?v=bhJF-KCB2xU>

There will be many many more of these testimonials to come as I have frequency treated over 140 people in the last 6 months for a whole manner of conditions both psychological and physical. We will also be very focused on getting a lot of wristband specific videos which will help potential customer immensely when deciding to purchase and viewing the site.

I share these videos now because you are our pioneers, our first wave of affiliates and we want you to understand the journey we have been on to set up this business.

---

## What Are The Wristband Frequencies Designed To Do?

For our first wristband we have selected a really nice combination of frequencies (from the 300,000 available in the frequency machine).

We have selected a frequency set designed to do the following:

- **Alignment**

This frequency package is designed to energetic align the persons energy centres (chakras / meridians / reflexes) and balance any imbalances in the energy field.

- **Grounding**

This frequency package is designed to ground the energy field and remove unbalances due to being ungrounded.

- **Anxiety and Stress**

This frequency package is designed to lower stress and anxiety in the wearers biofield.

- **Meditation**

This frequency package is designed to quieten the mind ready for meditation and to increase focus.

- **Sinus Clearance**

This frequency package is designed to open the nasal passage and clear the sinuses.

The wristband will receive these frequencies for 5 minutes every hour 24 hours a day for one year. After the year is finished the user can pay for another years worth of frequency for £39.99 or choose a different frequency package (more will be available to everyone shortly).

So when wearing a wristband of the first time I would suggest taking a mental note of any tension you feel in your body. How stressed you feel may be feeling and also take a breathe in through the nose to see if you are blocked in anyway.

For the next few hours take the test again and see if you feel any different or can breathe clearer. You may as the frequencies start sending each hour notice small sensations (this can depend from person to person depending on how kinaesthetic you are (touch feely sensitive in layman terms.

Some people are more visual and some people are more sensitive to sound. So this will vary from person to person.

Customers typically feedback to me that they feel a warming sensation, slight energy tingles and calming feeling while the frequencies are sending.

The aim of this band is to through out the day and night is to gently lower tension and bring about a nice balanced calm feeling. This we feel can be quite profound for many people because modern life is so hectic and stressful.

---

## Future Upgrades To The Wristbands

We have a whole host of new colours and designs that we will be releasing in the coming months but what I really would like to cover with you is the future ability you will have to change the frequencies going to your band yourself.

The concept of taking frequency away from a direct machine treatment to sending to a wristband was always intended to offer a whole host of different frequency packages. So we start with a really good base levels set of frequencies that will be fantastic for everyone. However we will be launching many more frequency sets such as:

- Cold n Flu
- Womans PMS
- Energy Balancing
- Emotional Release
- Muscle and Tissue
- Hay fever and many more

We are also working on a very special set which will be a 120 frequency plan where each day it focuses on a different area such as kidneys - emotional release - digestion - allergies etc etc This will be very good and we are excited to release this one to you in the coming months.

---

## Drinkifi Taste Enhancer - Amaze Your Friends!

### Amaze Your Friends and Affiliates With Drinkifi

The Drinkifi coaster literally works like a magic trick and it is the one instant thing you can do in front of any potential customer or affiliate that stops them in their tracks and gets them thinking!

The Drinkifi coaster has:

- No Power Source
- No Crystals
- No Circuit Board Technology

Yet through the weirdness / phenomenon of quantum physics the Drinkifi coaster receives 30,000 frequencies from the same server that powers the wrist bands. These frequencies then have an impact on the taste of the liquids that are placed on the coaster (for 1 minute).

**Typically this will:**

- Terrible tasting cheap wine or spirits (the kind that make you judder with a nasty after taste) become smoother and more palatable within 1 minute!
- Put a drink on like coca cola and it turns it into flatter sugar water in 1 minute!
- Tap water typically tastes more like bottled water as it makes it smoother and removes the chemical after taste that most tap waters have....
- Bottled beers taste like they are a smooth draft beer within 1 minute!

I challenge you to find anyone that is not gobsmacked by this product because you can put any liquid on it and it within 1 minute the frequencies change the taste and surface tension (texture) of the liquid.

---

## How does it do this?

Before we look at how this can be possible I would suggest taking a look at a couple of very strange phenomena with water because it is actually quite amazing how little science really knows about the very thing that makes up over 70% of our bodies.

This short video shows how water can be made to defy gravity and form a suspension bridge when an electric current is applied:

<https://www.youtube.com/watch?v=nqahQcjJXeM>

Another very interesting water documentary talks about how water has a memory like a computers hard drive and picks up information from the people and surroundings it encounters!

Fascinating stuff and once again this shows that there are many things science has yet to discover and fully understand about water.

<https://www.youtube.com/watch?v=59iuelCL0MQ>

Many of you will also be familiar with Dr Masaru Emoto's famous studies into how music / written language and even thought effects the structure of water and will be familiar with his famous rice experiment which you can see on the link below:

<https://www.youtube.com/watch?v=Ehlw-9PJkIE>

So that all said there is an awful lot of mysteries surrounding water which is incredible when you think we are mainly made of water. So coming back to the Drinkifi product there are many theories we could discuss as to why it works and how it works but we are very limited in what we can prove in a lab right now so we just like to focus on the taste changing aspect of the coaster.

The frequencies appear to resonate in the liquids placed on top of the coaster and effect the taste of the drinks in a positive way.

## What is the market for Drinkifi?

The most obvious market for Drinkifi is the hospitality industry because every pub / bar / restaurant / hotel in the world wants to be able to sell house wine and spirits. The premium brands like Smirnoff and Guinness all cost the bar more and have lower profit margins. So every pub needs 10+ drinkifi coasters and can rapidly recoup their investment by being able to sell the higher profit cheaper brands.

Another market is the wine and food “connoisseurs” because this is a great talking point at any dinner party. Fine wine lovers will find unique ways of using the Drinkifi coaster to enhance particular flavours. So this represents a very good market for the product.

There is also big market for the health conscious because people like the idea of having positive frequencies in what they drink.

---

## **Fantastic Tool For Affiliates**

Speaking from personal experience - in this last year I have done a lot of demo's to very influential people who naturally have had scepticism about the idea of wristband receiving frequency and the potential that can have for the wearer. However the second I pull out the Drinkifi coaster and change the taste of their coffee right before their eye they suddenly start listening very intently to what i am saying.

We believe that for all GYBB affiliates this product is the undeniable show stopper in live demo's. It shows within 1 minute that you are not insane for thinking a frequency band can make you feel less stressed and more focused.

How can anyone deny frequency does good things when it changes someone beer right before their eyes?

Changing the taste of a drink with a coaster that has no power source cannot be placebo unless you have secret magical powers that can change a persons taste buds!! So as an intro into our products this can be a priceless tool in your arsenal.

---

The coaster also emits frequency that most people can feel.... if you run it over your hand about 3cm above the skin then you will most likely feel the frequency.... for most people this can be very subtle tingles or a very subtle cool breeze feeling.

We have also found some other cool benefits which we cannot post on the website because it is not lab tested however we have found that if you are travel sick or hungover you can put the Drinkifi on your belly and let the 30,000 frequencies work their magic and you start to feel better quite quickly - why? I can only guess that it is because we are all 70% water!

There are several lab tests that we are going to do on the Drinkifi product to test if the frequencies remove or change the chemicals in water or if we can show on special Kirlian Photographic cameras energetic changes happening in the water. We plan to have these tests completed in 2015 and will reveal the results once we have them.

Regards
